## Company Recruitment Team

Dear H.R team.

I have gone through the requirements posted and I'm delighted to submit my application for this particular I.T position. As a recent graduate from Lakehead University with an M.S in Computer Science, I'm confident of my knowledge in Data Science, Business intelligence and analytics, and precise attention to detail would make me an asset to the team. .

## Why Me?

In my former role as an Android developer and Data Analyst in RedLap Digital, I was responsible for developing front-end interface for the android devices and connecting it to back end and troubleshooting a variety of technical issues for staff, assisting with server maintenance, and also perform analytics on the real-time food orders using tableau + spark SQL . While employed there, I also assisted in the development and roll out of new chat bot which increased customer retraction by 6%. I'm sure that this experience will help me start contributing quickly to the team.

While at Lakehead University, I specialized in and completed my capstone project on Extreme learning machines and Data Science, The IT technician position is an exciting opportunity for me to use this educational background, as well as learn more about a growing industry.

I've attached my resume, which further details my skills and education. Please do not hesitate to reach out if you have any questions, and I look forward to the opportunity to speak with you further. Thank you for your time and consideration.

Sincerely,

**Chandra Swarathesh Addanki**
